Shoulder

Anatomic and reverse total shoulder arthroplasty for osteoarthritis: outcomes in patients 80 years old and older

Revision rates and patient-reported outcomes after shoulder hemiarthroplasty vs. anatomic total shoulder arthroplasty in patients younger than 60 years: a cohort study with data from the Dutch Arthroplasty Register (LROI)

Elbow

Rates of long-term risk of revision and complications in total elbow arthroplasty in patients with rheumatoid arthritis: a propensity score-matched analysis

Reliability of radiologic assessment following total elbow arthroplasty: a varying observer agreement

Basic Science

Assessment and comparison of artificial intelligence–generated information regarding shoulder arthroplasty from multiple interfaces

Eccentric reaming is superior to augmented components in B2 glenoids: a biomechanical study

Rehabilitation and Kinematics

2025 Basic Science Neer Award Winner: The impact of posterior and posterior superior labral injuries and the effect of their treatment on glenohumeral kinematics in the deceleration and follow-through phase of throwing: a biomechanical study

Involvement of the scapulothoracic articulation after well-functioning reverse total shoulder arthroplasty

Review Articles

Ceramic humeral heads in shoulder arthroplasty: a systematic review

Anatomic healing of greater tuberosity improves range of motion and functional outcomes after reverse total shoulder arthroplasty for proximal humerus fractures: an updated systematic review and meta-analysis on 21 studies
