

Active poll 29/8

As conclusion, I think CAT:

- All except A 76%
- Can be avoided if I can have access to rapid fungus diagnostic test with a fast turnaround time 17%
- Can be avoided if I can have access to antifungal susceptibility results in a timely manner 7%
- Is the best first-line treatment option for IFI 0%
- Can be avoided in I can assess to antifungal TDM 0%
