Introduction

Teaching English to SMP/ SMA students can be both challenging and rewarding.

As this stage, students need to have a good foundation in the language and to dive deeper into more complex concepts.

To keep them engaged and motivated, it's important to incorporate a variety of activities and strategies into your lesson plans.

In this introduction, we will explore some effective approaches that can help you create engaging English lessons for these students.

3

Interactive discussion and debates

One of the best ways to engage SMP/ SMA students is through interactive discussions and debates.

- 01 This not only helps improve their speaking skills but also encourages critical thinking and active participation.
- 02 Choose topics that are relevant to their age group, such as social media, climate change, or current events. Provide students with some background information on the topic, then divide them into small groups for discussions.
- 03 Encourage them to express their opinions and support their arguments with evidence. You can also organize structured debates where teams present opposing viewpoints on a particular issue.
