KATA PENGANTAR

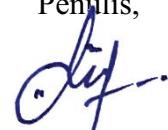

Puji syukur penulis panjatkan kepada Tuhan Yang Maha Esa karena atas rahmat dan karunia-Nya, penulis dapat menyelesaikan skripsi ini sebagai salah satu syarat untuk memperoleh gelar Sarja Manajemen pada Fakultas Ekonomi dan Bisnis Universitas Trisakti. Penulis menyadari bahwa penulisan skripsi ini masih jauh dari kata sempurna karena keterbatasan pengetahuan yang dimiliki penulis. Pada kesempatan ini, penulis ingin mengucapkan terimakasih kepada:

1. Orang tua penulis serta seluruh keluarga dan orang-orang terdekat saya atas doa dan dukungan kepada penulis sejak awal perkuliahan hingga dapat menyelesaikan skripsi tepat waktu.
2. Ibu Prof. Farah Margaretha, M.E., Ph.D., CRP, CIFM selaku Dosen Pembimbing Skripsi yang telah memberikan bimbingan dan motivasi kepada penulis selama proses penyusunan skripsi.
3. Ibu Dr. Sri Vandayuli Riorini, MM, CIQnR, CMP, CMA., CPM (Asia) selaku Ketua Program Studi Manajemen Fakultas Ekonomi dan Bisnis Universitas Trisakti.
4. Ibu Dr. Susy Muchtar, S.E., M.M., CIFM., CIMA selaku Dosen Wali dan dosen – dosen lain yang telah menginspirasi dan memotivasi penulis selama berjalannya perkuliahan dan proses penyusunan skripsi berlangsung.

Penulis sangat mengharapkan kritik dan saran yang bersifat positif dan membangun untuk mencapai sempurnanya skripsi ini. Semoga skripsi ini dapat bermanfaat bagi penulis khususnya dan bagi para pembaca, serta dapat digunakan sebagai bahan referensi yang dapat memberikan wawasan luas dalam bidang manajemen, khususnya keuangan.

Jakarta, Juni 2024

Penulis,

(Graficka Dea Evoney)

ABSTRAK

Penelitian ini bertujuan untuk menganalisis pengaruh risiko kredit seperti pinjaman bermasalah (NPL), provisi kerugian kredit yang diharapkan (ECL), dan rasio pinjaman terhadap simpanan (LDR) terhadap kinerja keuangan bank yang diukur dengan pengembalian atas aset (ROA). Penelitian ini menggunakan *purposive sampling* sebagai metode pengambilan sampel. Sampel yang diambil adalah perusahaan bank umum konvensional yang terdaftar di Bursa Efek Indonesia (BEI) periode lima tahun dari 2018 – 2022. Data dikumpulkan dari 44 bank dan dianalisis menggunakan statistik deskriptif dan model efek tetap untuk pengujian hipotesis. Pengujian data dilakukan dengan metode analisis regresi data panel menggunakan *E-views 9.0*. Hasil dari penelitian ini menunjukkan bahwa (1) NPL berpengaruh negatif terhadap ROA. Meningkatnya NPL akan menurunkan ROA, begitupun sebaliknya. (2) ECL berpengaruh negatif terhadap ROA. Meningkatnya ECL akan menurunkan ROA, begitupun sebaliknya. (3) LDR tidak berpengaruh terhadap ROA. Bank perlu mempertahankan NPL dan ECL yang rendah guna memaksimalkan kinerja keuangan bank. Berdasarkan penelitian ini, bank disarankan untuk melakukan evaluasi kredit dengan cermat sebelum permohonan pinjaman disetujui. Peneliti merekomendasikan agar penelitian selanjutnya dapat menambah variabel independen lain yang berpengaruh terhadap kinerja keuangan perbankan agar mendapatkan hasil yang lebih akurat dan umum.

Kata Kunci: pengembalian atas aset, pinjaman bermasalah, provisi kerugian kredit yang diharapkan, rasio pinjaman terhadap simpanan, risiko kredit.

ABSTRACT

This study aims to analyze the influence of credit risks such as non-performing loans (NPL), expected credit loss provision (ECL), and loan-to-deposit ratio (LDR) on the bank's financial performance as measured by the return on assets (ROA). This study uses purposive sampling as a sampling method. The sample taken is a conventional commercial bank company listed on the Indonesia Stock Exchange (IDX) for a five-year period from 2018 – 2022. Data were collected from 44 banks and analyzed using descriptive statistics and fixed-effect models for hypothesis testing. Data testing was carried out by panel data regression analysis method using E-views 9.0. The results of this study show that (1) NPL has a negative effect on ROA. An increase in NPLs will lower ROA, and vice versa. (2) ECL has a negative effect on ROA. An increase in ECL will lower ROA, and vice versa. (3) LDR has no effect on ROA. Banks need to maintain low NPLs and ECLs to maximize the bank's financial performance. Based on this research, banks are advised to conduct a careful credit evaluation before a loan application is approved. The researcher recommends that further research can add other independent variables that affect the financial performance of banks in order to get more accurate and general results.

Keywords: credit risk, expected credit loss provision, loan to deposit ratio, non-performing loans, return on assets.
